## **price guide ••• hair extension consultation**

### **hair extension**

For hair extensions we only use high quality European Slavic real hair, except for platinum coloured hair, hair that has its original colour and isn't chemically treated. Thanks to this method it can last for many years. Extension methods are keratin and micro rings connections.

We prepare the extensions ourselves. After the consultation, the best matching hair is chosen according to your hair (colour, structure of your hair and desired final look). After this, the hair extensions are prepared. We specialise on highlighted/multi-shadow hair extensions, so the final hair styling looks absolutely natural. It is necessary to reapply the extensions every three months. We use the same hair and just the tips are redone.

For a free consultation, please do not hesitate to contact us/book an appointment online.
